

International Day of Peace 2021

Mr. Ho-jun Jang

Mr. Ho-jun Jang is a senior at Kyonggi university in Suwon-si, KOREA. As the director of public relations at the Green Campus University Cooperative Council in Gyeonggi Province, I learned a lot about the environment and climate, and planned and implemented various activities to prevent the climate crisis. In addition, I have produced the White Paper on Youth of Y-SDGs in order to support and design the future direction independently, feeling the sympathy and necessity of setting goals together.

Currently, for sustainable development goals, an environmental organization called 'DAEJAYEON' provides environmental education for teenagers and teaches math at Maehyang Middle School.

Next year, I plan to create a non-profit organization with people of interest while developing environmental education and programs to prevent the climate crisis. In order to create a sustainable world, not just the state and the government, but also students, young people, and all age groups across the country will form a practical council centered on their goals and create a sustainable people and youth culture together by 2030.
